AMOUNT OF POPCORN AND OIL

Your new popper is equipped with a six ounce [177 ml] corn measure cup. We recommend flavored and colored coconut oil. Popcorn popped in coconut oil stays fresh longer. Coconut oil does not leave black deposits in your kettle like other oils.

Corn charge - 6 oz. [177 ml]

Oil charge - 1.6 to 2.0 oz. [60 ml]

Flavacol - 1 tablespoon [8 cc]

POPPING INSTRUCTIONS

1. Turn **KETTLE HEAT** and **KETTLE MOTOR** switch "ON".
2. Make test pop with 3 kernels of corn and 1 oz. [30 ml] of oil.
3. Pour pre-measured popcorn and oil pouch into kettle.
4. When corn has popped, dump kettle.
5. Repeat steps 3 and 4 for additional batches; always pop 3-5 batches for best popcorn.

CARE AND CLEANING

	<p style="text-align: center;">⚠ DANGER</p> <p>Unplug your machine before cleaning glass panel and case. Never immerse the kettle in water. This will ruin the electrical components and automatically void the guarantee.</p>
---	---

Each time you finish a series of poppings, wipe the outside of the kettle with a soft cloth to remove any oil drippage on the outside of the kettle. After you finish popping for the day, allow kettle to cool until it is not too hot to handle, but still warm. Place kettle in the dump position. With a cloth, wipe out the inside of the kettle, kettle lid, crossbar, outside and underneath of the kettle.

Cleaning the cabinet of your machine is easy. Wipe excess grease from the glass using a clean cloth. Wipe the outside of the machine also.

NOTE: Never use a glass or plastic cleaner that contains ammonia. It will crack the plastic on the machine.
